

**Discover How
Deltapath[®] Can
Help Cisco Unified
Communications
System Customers**

Get The Facts

Cisco announced the end of sale on Perpetual Licensing for Cisco Unified Communications Licensing, which also ends the ability to renew your Smartnet support contracts.

If your Cisco endpoints are approaching end-of-life, your phones may not work or be supported by either Cisco Unified Communications Manager Release 14 or Cisco Collaboration Flex Plan. Equally important, there is a high possibility that your endpoints will become deprecated models, increasing your annual operating costs.

If you migrate to the Cisco Collaboration Flex Plan, you may be required to purchase new server hardware as part of the transition to a Cisco Collaboration Flex Plan.

Imagine Not Having To Rip and Replace Your Legacy and End of Life Endpoints

Suppose your endpoints are delivering on your business needs. In that case, you do not need to purge perfectly working endpoints.

The durability of your endpoints can translate into many years of service, and the high costs, which may take several years to be amortized, translate into companies wanting their investments to work longer for them.

The Deltapath UC platform is built to support many Cisco endpoint models. In addition, it supports many deprecated and end of sale/end of support phone models from releases 14, 12.0x, and 11,5x.

Interoperability: The Nucleus of Deltapath's UC Platform

Deltapath's UC platform is built with the workplace of the future in mind – a workplace that does not believe in a single branded approach and where everyone is connected because devices interoperate. Different brands of endpoints such as Cisco, Avaya, Poly, and other brands seamlessly coexist, and work with each other. So, buy what your company needs instead of focusing on a single brand approach.

Deltapath's end-to-end UC solution ensures every call is clear to deliver an in-person experience. As a result, your conversation flows naturally and participation increases. This improved experience can be accessed anywhere—via your desktop, mobile, and in meeting rooms.

How the Program is Delivered: Deployment Options

You can deploy Deltapath UC on a virtualized server or a cloud provider. Deltapath supports VMWare ESXi, Microsoft Hyper-V, Linux KVM, Amazon AWS, and Microsoft Azure.

You can also choose to receive Deltapath appliances at no additional charge.

Experience Top Of The Line Features And Capabilities With Deltapath's UC Platform. Plus, Our UCaaS Subscription Price Is Approximately 20% Less Than Your CUCM Annual Maintenance Price

Value Added Services

Our UC solution comes with many add-on services to complement your core services and help you improve the benefits you offer customers and employees. Here are some of our popular value-added services:

- ✓ Microsoft Teams Integration. E1 and E3 users can enjoy telephony services.
- ✓ Push-to-Talk is an additional communication channel that offers instant connectivity to one person or a group of people.
- ✓ Cinch, Deltapath's inbound contact center, allows agents to fulfill various services and improve customer satisfaction.
- ✓ Proactive Engagement, Deltapath's outbound contact center allows agents to work on multiple campaigns that play a crucial role in lead generation, sales, subscriptions, feedback surveys, debt collection, and more.
- ✓ Serviced Office provides robust tools designed to help companies manage their serviced offices.
- ✓ Salesforce.com integration allows companies to create more engaging customer and employee experiences that give you an advantage over competitors.
- ✓ Service Provider Call Billing allows you to optimize revenue and manage your telephone services.

About Deltapath

Deltapath liberates organizations from the barriers that prevent effective communication and revolutionizes the way organizations communicate through innovative technologies that meet the needs and the wants of organizations.

We specialize in solutions that unite different communication platforms, audio and video equipment, telephones, desktops, and mobile devices to make communication accessible and intuitive.

It is our belief that every solution should embody simplicity and offer users the right form of communication for the right occasion, right at their fingertips.
