

Avaya Customers

Discover How  Deltapath[®] Can Help You

Get The Facts

A lot is happening at Avaya, probably making you wonder what's next. First, Avaya's flagship product, the Avaya Aura 8, is officially end-of-support. With its end comes the end of perpetual licensing.

If you are considering migrating to the new subscription-based platform, Avaya Aura 10, ensure you do not have to rip and replace your legacy endpoints and those endpoints approaching end-of-life (EOL). Replacing endpoints is costly, increasing your annual operating costs.

Imagine Not Having to Rip and Replace Your Legacy and End of Life Endpoints

It is difficult to purge working endpoints just because you are moving to a new platform, especially when your endpoints are still delivering on your business needs. Plus, at their high price tag, which may take several years to be amortized, companies want their investments to work longer.

Strategize about the Future with the Deltapath Unified Communications Platform

Extend the Life of Your Investments

Avaya phones work natively on the Deltapath UC platform, significantly reducing the cost of migrating to a new platform. In addition, our platform supports many deprecated and end-of-sale / end-of-support phone models.

J129	J139	J159	J169
J179	J189	9641G	9611G
9608G	9650	9620	

Discover Interoperability

Deltapath's UC platform is built with the workplace of the future in mind — a workplace that does not believe in a single branded approach and where everyone is connected because devices interoperate. Different endpoint brands such as Avaya, Cisco, and Poly coexist and work with each other on our platform.

We never force our customers to stick to one brand of endpoints. Instead, customers invest in the brands they want and get the features they need to operate successfully.

Flexible Is Our Middle Name

Deltapath supports employees who work from anywhere on Android and iOS. The company also offers a desktop application that works on Windows and Mac, or users can log in from a browser.

Experience Feature Rich Mobility Solutions

If you are like most companies today, you have a mixed workforce that includes virtual workers, office workers, and perhaps field workers. Mobility solutions offer your workforce the ability to communicate and collaborate from anywhere.

- ✓ Deltapath Mobile is a business phone app. Employees can enjoy different modes of communication, from video calls, audio conference calls, push-to-talk, and one-to-one or group chat.
- ✓ Deltapath Engage is a softphone that closely mirrors the mobile app experience. Users access Deltapath Engage from a desktop computer or laptop, where they can place and receive audio and video calls or initiate a conference call with numerous people.

Deployment Options

You can deploy Deltapath UC on a virtualized server or a cloud provider. Deltapath supports VMWare ESXi, Microsoft Hyper-V, Linux KVM, Amazon AWS, and Microsoft Azure.

You can also choose to receive Deltapath appliances at no additional charge.

Experience Top Of The Line Features And Capabilities With Deltapath's UC Platform

Value Added Services

Our UC solution has many add-on services to complement your core services and help you improve the benefits you offer customers and employees. Here are some of our popular value-added services:

- ✓ Deltapath Talk integrates with Microsoft Teams allowing E1 and E3 users to enjoy telephony services.
- ✓ Deltapath Omnichannel Contact Center is the next generation of contact centers that lets customers engage with agents while seamlessly moving between different communication channels.
- ✓ Proactive Engagement, Deltapath's outbound contact center allows agents to work on multiple campaigns crucial in lead generation, sales, subscriptions, feedback surveys, debt collection, and more.
- ✓ Serviced Office provides robust tools designed to improve workplace efficiency for serviced office spaces/coworking spaces.
- ✓ Salesforce computer telephony integration allows companies to have a 360-degree view of their customers and control their phones inside Salesforce.com.
- ✓ Service Provider Call Billing allows you to optimize revenue and manage your telephone services.

About Deltapath

Deltapath liberates organizations from the barriers that prevent effective communication and revolutionizes the way organizations communicate through innovative technologies that meet the needs and the wants of organizations.

We specialize in solutions that unite different communication platforms, audio and video equipment, telephones, desktops, and mobile devices to make communication accessible and intuitive.

It's our belief that every solution should embody simplicity and offer users the right form of communication for the right occasion, right at their fingertips.
